

Carneala Odom | Software Developer

With a strong commitment to continuous learning and a passion for all things tech-related, I am a software developer on a mission to create innovative solutions. I thrive on collaborating with diverse teams, exchanging ideas, and bringing projects to life with creativity and precision. I am ready to embrace new challenges.

Skills

Languages - JavaScript, HTML, CSS, Python, SQL, Mongo, JSON, React

Database - PostgreSQL, MongoDB | **Other** - RESTful Routing, JSON api

Libraries and Frameworks - React, Express.js, Django, JQuery, Bootstrap

Interpersonal Skills - Communication, Attentive, problem Solving, Collaborating

Software Development Projects

BlessDay - JSX, JavaScript, MERN, HTML, and CSS

8/2023

Full stack application that allows users to express feelings and emotions for the day, and view motivational quotes.

- Created a dynamic system that allows users to input their emotions for the day and receive motivational quotes or scriptures tailored to their feelings, enhancing their daily positivity and motivation.
- Utilized JavaScript to build the core functionality of the application, including user authentication, data storage, and real-time updates.
- Developed a RESTful API with Express.js to handle data requests, enabling smooth communication between the front-end and back-end components of the application.

Cuisine Quest - Django, JSX, HTML, CSS, and PYTHON

7/2023

An application that allows users to explore your taste buds, researching different dishes, restaurants, and create meals.

- Facilitated social interaction by enabling users to share their culinary creations and experiences with a community of food enthusiasts.
- Collaborated effectively within a team of 3 software engineers by utilizing GitHub for version control, enabling streamlined code management and fostering a collaborative coding environment.
- Leveraged database technology, e.g., MongoDB, to store and manage a rich repository of dishes, restaurants, and user-generated content.

LUXD-REVIEWS - Javascript, EJS, Express

6/2023

Full-stack application that allows users to post about their service and or experiences with specific stylists.

- Made RESTful API fetch calls to an Express, MongoDB, Node.js backend handling all create, read, update, delete (CRUD) operations, and tested all backend routes during development using Postman.
- Used Mongoose to define schemas for MongoDB collections.
- Created a seamless user experience by implementing both front-end and back-end components. d Git control during the production of the application with frequent commits until deployment.

Professional Experience

Assistant Property Manager - Cushman and Wakefield | Petaluma, CA

02/2018 - 05/2023

- Conducted thorough property tours for potential prospects, showcasing the unique features and amenities of various properties.
- Managed the financial aspects of property operations by creating Purchase Orders (POs) and processing invoices, ensuring accurate and timely payment to vendors and service providers.
- Successfully negotiated lease renewals, demonstrating strong communication skills and an ability to address tenant concerns while aligning with company objectives. Monitored rent collection and tenant accounts, proactively addressing any outstanding payments or financial issues to maintain a healthy financial portfolio for the properties.

- Collaborated with the accounting department to reconcile financial statements, ensuring that income and expenses were accurately reflected in property financial reports.

EDUCATION

General Assembly | Remote

06/2023 - 09/2023

Software Engineering Immersive

Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual and group projects.
